

U.S.A. TECH

WATER FILTRATION

PROUDLY MADE IN THE U.S.A

USATECH PLUS AC 01

Usatech Carbon Block's Plus AC filters are manufactured using activated coconut shell carbon to provide the highest level of multiple particulates reduction.

Each block is wrapped with a polypropylene outer layer and netting to prevent premature clogging of the carbon block. All materials and components are FDA-compliant, making them ideal for use in residential, food service and commercial drinking water applications.

Features & Benefits

- Multi Layer Carbon Block
- 100% Coconut shell Carbon
- 1micron Nominal Filtration
- Particulate/Rust, Sand & Sediment Reduction* Class 1 – 0,5 to < 1 micron in size
- Exceptional Chlorine, Taste and Odor Reduction*
- Voc Reduction* atrazine, alachlor, lindane, (THMS) etc
- Chloramine Reduction*
- Microbiological Cysts, Cryptosporidium & Giardia Reduction*
- Pesticides, Herbicides Reduction*
- Heavy Metals Reduction* Lead, mercury, etc
- Asbestos Reduction*
- Pharmaceutical Reduction* Ibuprofen, Phenytoin, Estrone, Bisphenol A, etc

Part Number	Nominal Dimensions	Chloramine/Lead Mercury/ VOC/MTBE*	Initial Pressure Drop* (PSI)
CB2510CP01	2.5" x 10"	500gals@1GPM	<10psi@1GPM
CB2520CP01	2.5" x 20"	1,000gals@2GPM	<10psi@2GPM
CB4510CP01	4.5" x 10"	1,500gals@3GPM	<7psi@3GPM
CB4520CP01	4.5" x 20"	3,000gals@6GPM	<7psi@6GPM

Important Notice

Performance claims are based on a complete system. The filter must be used in an approved system and operating according to the system’s specifications. Each application must be followed in order for the filter to perform properly.

Warnings

Usatech Carbon Block filters are to only be used with microbiologically safe water. The filter is not designed to kill or remove bacteria or viruses. All information is based on data believed to be reliable. This information is offered for verification and evaluation only and is not intended to be a warranty.

**Based on Internal manufacturer’s testing*
